A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission (arguments) filed on January 30, 2006 has been entered.

Applicant's amendment filed on March 07, 2006, which amends claims 1 and 41, has also been entered.

Claims 1-6 and 41-44 are pending, and are allowed.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The specification has been amended as follows:

In the second line of the paragraph inserted on page 1 by the amendment filed January 14, 2004: --(now U.S. Patent No. 6,753,097)-- has been inserted after "2001,".

The rejection under 35 U.S.C. 103(a) based on JP 9-268284 is overcome by applicant's amendment filed March 07, 2006. JP 9-268284 does not disclose or suggest the presently claimed subject matter.

For the record, the examiner notes that JP 8-199162 could have been applied under 35 U.S.C. 102(b) against at least claims 1 and 41 prior to the March 07<sup>th</sup> amendment. See the second formula on page 7 of the reference. However, JP 8-199162 does not disclose or suggest the presently claimed subject matter. (JP 8-199162 was cited by applicant during prosecution of priority applications 09/186,061 and 09/961,230, but was not listed on a 1449 in the present application. The reference is made of record via the attached PTO-892. A copy of the reference is not provided herewith. The reference is viewable in priority application 09/961,230, which is an IFW application.)
